

Lathe Automation System

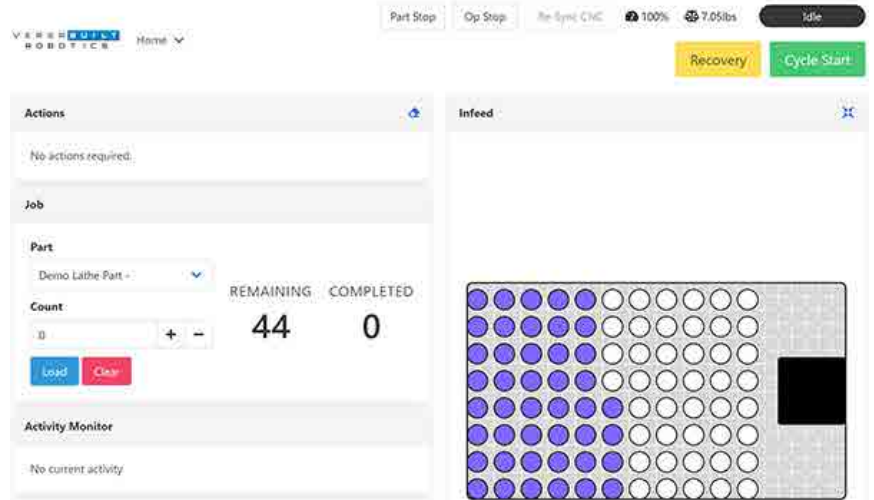

VersaBuilt Robotics

The Lathe Automation System is a complete pre-programmed and pre-integrated automation solution that allows new parts to be introduced to the automation system without a third-party integrator.

Features:

- VersaCart Robot Cart with Visual Infeed System
- DuoGripper
- VersaBuilt System Controller
- All pneumatic valving and air lines
- One-on-one training for operators and machinists
- Detailed Instructions and online videos
- VersaBuilt Support Team to ensure your success
