

# CoWelder MIG/MAG or TIG

Migatronic

CoWelder is a simple automated welding solution. It is invented for ambitious manufacturing companies of all sizes in all industries that want to increase productivity and improve quality in welding. Increase arc time, get a flexible scale production, ensure uniform high-quality welds and free your welders from monotonously repeated work.

CoWelder brings a new definition to the word flexibility in modern day industrial production. It is so easy to switch over the production that it pays off to automate welding of simple workpieces no matter the quantity or frequency. Fantastic welding capabilities mixed with the agility and safety of the collaborative robot simply lifts all aspect of your welding production.

CoWelder is available with Migatronic welding machines for MIG/MAG or TIG.

## Features

- High-end Migatronic welding machines for MIG/MAG or TIG
- Miga Smart Tool for easy programming on the robot arm
- Clever software functions tackles the hardest challenges
- Easy integration into existing production environment
- Follows the latest standards for safety to ensure safe operation

## Specifications:

- **Software required:**

Polyscope 5.12.4+

- **What's in the box?**

UR10e

Welding Machine (MIG/TIG)

Siegmund Welding Table

MigaSmartTool

MigaWeld Software

Welding Torch (AB ROB W500/AD250)

Tack Software

Offset Software

Weave Software

- **Certifications & Standard:**

CE - Machinery Directive

- **License type:**

One-time purchase
